CSE- PDTI
US OTC: PDTTF

Preferred Dental Technologies Inc. (“Company”) (CSE: PDTI, US OTC: PDTTF):

Receives notice of additional patent to be granted for the EU countries

Preferred Dental Technologies Inc. has received correspondence from our patent agent that the European Patent Office has stated its intent to grant an additional patent for the EAS Series.

As the core technology of the EAS Series has tremendous potential for adaptation in terms of material, design, processes and applications, continued Research & Development has been an integral part of the company’s activities. The need to protect these additional developments is vital as these new designs establishes new verticals for additional markets and growth potential.

Preferred Dental Technologies is committed to the concept of “Value Plus” by delivering a superior product at the same or lessor price than competitive products that cannot match the versatility of the EAS Series. The majority of small companies in this space rely on providing older cloned technology and do not possess their own unique Intellectual Property. Preferred Dental is in a rare position for a company our size by developing, owning and offering new, patented Intellectual Property.

Mr. Erik Siegmund, President, stated, “We are committed to continued development of the EAS Series. With the core technology being well reviewed, we have always known that the unique design has the potential to reach far beyond its initial patents. From digital dental offerings to non-precious material developments, each additional patent represents new increased IT value in the company’s product portfolio and expands our reach into additional markets. I am very pleased to see this advancement with the European Patent Office on this matter as it provides protection and stability in the quality and innovation driven EU markets.”
