**Preferred Dental Technologies Inc. (“Company”) (CSE: PDTI, US OTC: PDTTF): Announces
Collaboration with Established Dental Lab to create demonstration models**

Preferred Dental Technologies Inc., is pleased to announce that they are nearing the point where full arch dental models will be available to all their salespeople.

Mr. Peter Vargas, owner of Logic Dental Solutions, a high quality C&B dental lab stated, “I have worked closely with Preferred Dental Technologies Inc. (PDTI) over the past several months, creating a model for demonstration to dentists and other labs. I was intrigued with the EAS system when I first learned about it. The benefits claimed are indeed of interest and value to every dental laboratory and dentist. I was pleased to work out a collaboration type deal to manufacture these models. As I was working on the model, I employed my 45 years experience in trying to improve the system and offer constructive criticism. Despite my best efforts, the conclusion I came to after spending endless hours trying to tweak and improve the EAS system was that it provides the perfect solution just the way it is. A technician using the EAS as designed will find they will save a lot of time if used as directed, in addition they will have a perfect restoration. The EAS offers the simplest solution that I have seen to solve complicated restoration cases. Angulation and parallelism are no longer an issue when using the EAS, and the dentist can offer their patients a superior high quality restoration that can easily be taken down to bone level in the dentist office chairside for cleaning and maintenance. I will be offering the EAS solution to my current clients when they are faced with a difficult case, and look forward to working closely with PDTI.”

"It is my pleasure to introduce our working relationship with such an experienced dental technician as Mr. Peter Vargas, C.D.T. The design philosophy of the EAS System has been formulated to quickly and efficiently solve the day to day challenges dental technicians encounter. The amount of time and effort which goes into solving the difficulties of case design has always been a factor and it is gratifying to hear of Mr. Vargas' positive experiences using our system. The unique EAS system allows technicians to focus on creating superior aesthetics and I am certain Mr. Vargas' patients will appreciate the quality that will come with using our system."

The Company has been actively promoting the EAS system using digital presentations and printed marketing material, but nothing takes the place of putting a model in a technicians hands where they can take it apart and put it back together. This creates the WOW factor, and some comments received were “I could have used this last week” “This works so simply, I wish I would

have thought of this.” PDTI will supply all salespeople with models to assist them in closing sales. There is nothing better than show and tell in a demonstration to showcase the uniqueness of the EAS system.

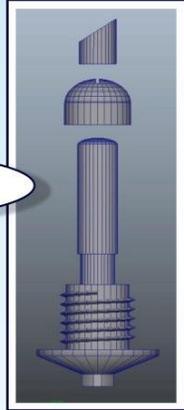

Disruptive Technology for the Global Dental Implant Market
