**Preferred Dental Technologies Inc. ("Company") (CSE: PDTI, US OTC: PDTTF): Announces
First EAS implant case in Brazil**

PDTI first introduced the EAS system to Dr. Fiuza, a Sao Paulo dentist who owns and operates a clinic with 5 dentists about 16 months ago. We have been informed he will be using the EAS system for a complex case involving total upper and lower oral rebuilding. Dr. Fiuza said, "In analyzing this full mouth restoration, my immediate thought was to use the EAS Series. Having been reviewing the systems merits, I feel this is an excellent situation to take advantage of the system's unique features".

Dr. Fiuza plans on doing a full write-up on this case and intends to speak on the procedure to various Sao Paulo dental study groups as well as preparing a submission for possible publication.

In addition, in the new year we expect to be holding talks with the distributor identified by our Brazilian advisors. This company has already been approached by our advisors to gauge their initial interest and further discussion will continue when they are in Brazil at the start of the year.

Brazil is the 3rd largest global market for dental implants and remains one of the fastest growing worldwide with 15% of the world's dentists working there.

CEO Erik Siegmund said, "With the first of our trained sale reps now approaching dental offices in the United States and the first of what I expect will be many treatments in case planning beginning now in Brazil, I am very excited to say that Preferred Dental Technologies Inc. is hitting yet another major company milestone."
